

A photograph of a multi-story brick building at night, illuminated by warm string lights along the roofline and windows. The building has a rustic, industrial feel. In the foreground, there is a concrete planter box with some greenery and a paved walkway. A person is visible near the entrance on the right side of the building.

TOGETHER

THE HISTORY

The Baton Rouge Electric Company (BRECO) power plant at 1503 Government Street is a former power plant building constructed in 1915. The BRECO plant was the exclusive provider of electric power to the city of Baton Rouge between 1915 and 1930.

After 1930, the plant briefly provided reserve power in support of Louisiana Station. In 1938, BRECO merged with Gulf States Utilities (GSU) which continued to operate the site until 1994, when Entergy took over and occupied the site until 2011.

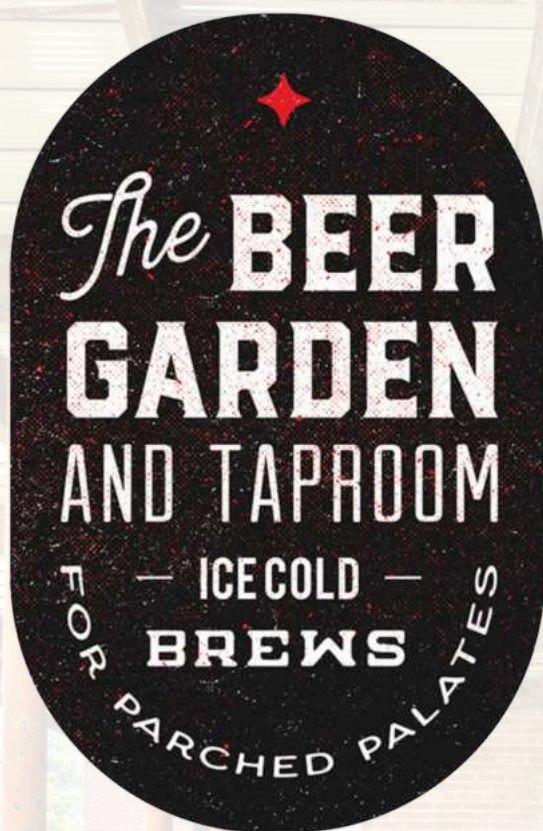

THE SOCIAL EXPERIENCE

Located inside the newly renovated Electric Depot, Red Stick Social is the capital city's premier entertainment venue.

State of the art bowling. Live music in an intimate setting. Locally inspired fare with indoor and outdoor seating. Private, group, community meeting and events. Social gathering spots. All in one place, unlike anything Baton Rouge has seen before. Red Stick Social was created to bring people together. It's the perfect spot to celebrate or mingle, to reminisce about old memories or create new ones.
